DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 29, 2005 has been entered. Claim 1 is amendment. Claims 6, 10, 14 and 18 are deleted. Claims 20-23 are added.

2. Newly submitted Claim 22 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The instant claim is drawn to a method of preventing separation of polyether over time from a cured product of a hydrophilic polyorganosiloxane composition containing the polyether. Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, Claim 22 has been withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03. Now, Claims 1-5, 7-9, 11-13, 15-17, 19-21 and 23 are pending for consideration.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-5, 7-9, 11-13, 15-17, 19-21 and 23 are rejected under 35

U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

In Claim 1, Examiner is not able to find the basis of “10 to 50 mol% of diphenylsiloxane units” and “20 to 50 mol% of methylphenylsiloxane units”.

In Claim 1 (last two lines) and Claim 23 (last two lines), Examiner is not able to find the basis of “a contact angle of up to 55°”.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kuo-Liang Peng whose telephone number is
